

QPON Sri Lanka

Bulk HR Onboarding

Full Feature Overview

What it is · How it works · What HR gets · What employees get · Full 360° flow

Version 1.0 · April 2026 · For Development Team

■ What Are We Building?

A self-service web portal at business.qpon.lk where any company's HR manager can sign up, purchase QPON subscriptions for all their employees in bulk, monitor employee savings and engagement, manage their billing, and download reports — all without calling or emailing QPON. Think of it like a company admin panel for QPON employee benefits. HR buys once, employees benefit automatically, and everything is tracked in one place.

01 THE BIG PICTURE — THREE PEOPLE, ONE SYSTEM

Understanding who uses what and why

Three People Are Involved

How They're Connected

02 THE COMPLETE FLOW — STEP BY STEP

From first login to employee happily using QPON — everything that happens in order

PART A — HR Manager Journey

1**HR visits business.qpon.lk**

HR finds the portal — through a link from Ranjula, a WhatsApp message, or the QPON website. They see a clean landing page explaining the employee benefit. They click 'Get Started for Free'.

2**HR registers the company**

HR enters: Company name, their name, work email, and mobile number. QPON sends a one-time password to their WhatsApp to verify. No credit card needed to register. Account is created immediately.

3**HR configures the subscription**

HR sees three plan options based on company size. They select how many Silver seats (standard benefit — dining, grocery, pharmacy deals) and how many Gold seats (premium — adds 8% fuel cashback on top). The total monthly cost updates in real time as they adjust the numbers.

4**HR chooses how to pay**

Four payment options: (1) Company Invoice — QPON sends a monthly invoice, HR pays by bank transfer. (2) Credit/Debit Card — charged automatically each month. (3) Payroll Deduction — employees pay half, deducted from salary. (4) Purchase Order — HR provides a PO number, QPON invoices with that reference for finance.

5**HR clicks Confirm**

Subscription activates immediately. HR does not need to wait for payment to clear (for invoice billing). An invoice is emailed to the finance team within 24 hours.

6**HR uploads the employee list**

HR downloads a simple template CSV file. They fill in employee name, phone number, department (optional), and tier (Silver or Gold). They upload the CSV — the system validates it and shows a preview. HR clicks 'Send Activation Links'. Done. The system handles everything from here.

PART B — Employee Journey

1**Employee receives a WhatsApp**

Within 2 minutes of HR uploading the CSV, every employee receives a personalised WhatsApp message. The message comes from a QPON business number but is branded with the company name. Example: "Hi Nimal! MAS Holdings has activated your QPON employee benefit. Tap here to claim your account: qpon.lk/activate/your-link"

2

Employee taps the link

The link opens a mobile-optimised page. It shows their company logo and name, their name pre-filled, and a summary of what they get. There is ONE button: 'Activate My Account'. No form to fill. No password to create. One tap — they're in.

3

Employee gets their QPON account

Their QPON account is created and linked to their company benefit automatically. They are taken straight to download the QPON app on App Store or Google Play. Once they open the app, their Silver or Gold tier is already active.

4

Employee uses QPON every day

Employee browses deals near them — restaurants, fuel stations, pharmacies, grocery stores. They show the app at checkout to redeem. Every redemption is recorded automatically. The app shows them a running total: 'You've saved LKR 3,200 this month.'

5

Employee receives monthly savings statement

On the 1st of every month, the employee gets a WhatsApp from QPON: 'Your savings in April: LKR 4,200. Dining: LKR 2,800. Fuel: LKR 900. Grocery: LKR 500. Total saved since joining: LKR 18,600.' This is automatic — no one needs to do anything.

03 WHAT HR GETS — THE FULL DASHBOARD

Every feature the HR manager sees and uses inside the portal

 Live KPIs Always visible on the dashboard	 Employee List Full control over every seat	 Invoices Every bill in one place	 Reports Monthly data for the board
---	--	--	--

Dashboard — What HR Sees the Moment They Log In

■ Live Activation Summary

A counter showing: Total seats purchased / Employees activated / Employees pending activation. Updates in real time as employees tap their WhatsApp link. If 12 employees haven't activated yet, HR sees '12 pending' and can resend their links in one click.

■ Total Staff Savings This Month

The combined savings of all employees in the current calendar month shown in LKR. Next to it: the average saving per employee. Example: 'Your 488 employees saved LKR 2,100,000 this month. Average: LKR 4,200 per person.'

■ Monthly Cost and ROI

Shows what the company paid this month and what the employees saved. Calculates the ratio automatically. Example: 'Cost: LKR 600,000 · Employee savings: LKR 2,100,000 · Ratio: 3.5:1'

■ Activity Feed

A live feed of the last 10 actions: 'Nimal Perera activated', 'Kavindi Silva upgraded to Gold', 'Monthly savings report sent to all 488 employees', 'Invoice generated'. HR knows exactly what's happening without asking anyone.

Employee Management — Full Control

◆ Full Employee Table

HR sees every employee in a table: name, department, tier (Silver/Gold), activation status, date they joined, and their savings this month. Sortable and searchable by name, department, or status.

◆ Resend Activation Link

For any employee showing 'Pending', HR clicks 'Resend' and a new WhatsApp goes to that employee instantly. No calling QPON support. No emails. One click.

◆ Add New Employees

When a new person joins the company, HR adds them — either one by one (type name and phone) or in bulk (upload a new CSV with just the new joiners). New employees get their WhatsApp activation immediately.

◆ Remove Leavers

When an employee leaves, HR removes them from the portal. Their QPON benefit deactivates at the end of that month. The seat count updates automatically and the next invoice reflects the change.

◆ Change Tier

HR can upgrade any Silver employee to Gold at any time. The cost difference is added to the next invoice proportionally. The employee's QPON app upgrades immediately — no action needed from the employee.

04 REPORTS — WHAT HR CAN SEE AND DOWNLOAD

Every report HR needs to justify the benefit to their board

■ Monthly Savings Report

Available on the 1st of every month for the previous month. What it shows: • Total company spend on QPON (what they paid) • Total employee savings (what employees saved) • ROI ratio (savings divided by cost) • Savings breakdown by category: Dining, Fuel, Grocery, Pharmacy, Retail • Redemption rate: what % of employees used QPON at least once • Top 10 saving employees (names optional — HR can choose anonymised) • Department breakdown: which team saved the most Downloadable as a clean PDF formatted for board presentations.

■ Individual Employee Spending Report

HR can click on any employee name in the employee table and see their personal spending summary. What it shows for each employee: • Total saved this month and all-time • Number of times they redeemed • Categories they spent in (Dining, Fuel, Grocery etc) • Which merchants they visited (merchant names only — not individual transaction amounts) • Whether they are on Silver or Gold tier • Whether they have been active this month or inactive Important: QPON does not share exact transaction values to protect employee privacy. HR sees savings totals and categories — not 'Nimal spent LKR 450 at Java City on April 5'.

■ Trend Report

Shows month-on-month data for up to 12 months: • How employee savings have grown each month • How activation rate has changed • How redemption rate has changed • Total cumulative savings since the company started This is the slide HR puts in their annual HR review to show the board that the benefit is being used and growing in value.

■ Board Summary — One Page

A single-page PDF that HR can download and hand directly to the CFO or CEO. It shows three numbers in large clear format: • What the company paid: LKR 600,000 • What employees saved: LKR 2,100,000 • ROI ratio: 3.5:1 Plus one line: 'Your 488 employees saved an average of LKR 4,200 each last month on food, fuel and groceries. This benefit costs less than one team lunch per employee per year.' Clean. Professional. No explanation needed.

05 WHAT THE EMPLOYEE GETS

The complete experience from the employee's point of view

 Dining Deals Restaurants, cafés, fast food	 Fuel Cashback Gold tier — 8% back on fuel	 Grocery & FMCG Keells, Arpico, brand deals	 Pharmacy Health & wellness savings
---	--	---	---

■ One-Tap Activation

Employee receives ONE WhatsApp. Taps ONE link. Account activated. No app store search required, no password creation, no form to fill. The entire activation takes under 30 seconds.

■ Real Savings Every Month

Silver tier employee spending LKR 15,000/month on dining and groceries saves LKR 3,000–5,000 per month. Their LKR 1,200 company-paid subscription pays for itself in the first two restaurant visits. Gold tier employee spending LKR 40,000/month on fuel gets LKR 3,200 back in fuel cashback alone.

■ Personal Savings Dashboard

Every time the employee opens QPON they see: 'You've saved LKR 3,200 this month. Your subscription costs LKR 1,200. You are LKR 2,000 ahead.' This makes the value visible and real — not just a vague perk.

■ Monthly Savings Statement on WhatsApp

On the 1st of every month, the employee gets a WhatsApp summary: what they saved, in which categories, and their total savings since joining. This is automatic — they don't need to open the app to see it.

■ Personalised Deals

The QPON app learns what the employee redeems most. A fuel-heavy user sees fuel deals and auto service offers first. A dining-heavy user sees restaurant deals and new restaurant alerts. Deals are not generic — they are relevant to that person's spending pattern.

■ Company Branded Experience

When the employee activates, the first screen says 'Welcome to your [Company Name] benefit, powered by QPON.' They associate the savings with their employer — not just with an app. This directly increases employee satisfaction and loyalty to the company.

06 BILLING — HOW HR PAYS

Four ways to pay — all fully self-service inside the portal

Method	How it Works	Best For	Invoice Timing
■ Company Invoice	QPON sends a monthly invoice to the finance email. HR pays by bank transfer. Subscription stays active while invoice is unpaid (up to 30 days).	Large corporates with finance departments (MAS, Dialog, JKH)	1st of each month — due in 30 days
■ Credit / Debit Card	HR enters card once. QPON charges automatically every month. HR receives a receipt by email. No action needed each month.	Medium companies wanting zero-hassle automatic billing	Charged on 1st of month automatically
■ Payroll Deduction	Company pays 50%, employee pays 50% from salary. HR downloads a deduction list each month showing which employees to deduct how much from payroll.	Companies that want employees to share the cost	HR receives deduction CSV on 1st — processes with payroll
■ Purchase Order	HR enters their company's PO number. QPON raises the invoice with the PO reference for easy matching in the company's finance system.	Government-linked or tender-based procurement processes	Invoice raised with PO reference — 30-day terms

■ Seat Changes and Proration

When HR adds or removes employees mid-month, the cost adjusts automatically:

- Add 50 employees on the 15th of the month → they pay half a month for those 50 seats (prorated). The extra cost appears as a line item on the next invoice.
- Remove 20 employees on the 10th → a credit appears on the next invoice for the unused portion. HR never overpays and never underpays. The system calculates everything. HR just manages their headcount — billing adjusts automatically.

■ Invoice History

HR can see every invoice ever issued inside the portal. Each invoice shows:

- Invoice number and period (e.g. INV-2026-04 · April 2026)
- Number of Silver and Gold seats billed
- Total amount due
- Status: Pending / Paid / Overdue
- Download as PDF — for finance reconciliation

Invoices are also emailed automatically to the billing email on the 1st of each month. Finance receives the invoice without HR having to do anything.

07 PRICING — THREE TIERS

Pricing based on company size — bigger company = lower per-seat cost

Plan	Company Size	Silver Seat / Month	Gold Seat / Month	Annual Option	Key Feature
Starter	50–199 employees	LKR 1,500	LKR 2,800	Not available	HR dashboard, CSV activation, monthly report
Growth ■	200–999 employees	LKR 1,200	LKR 2,400	Pay 10 months, get 2 free (17% saving)	All Starter + Gold tier + dedicated account manager
Enterprise	1,000+ employees	LKR 1,000	LKR 2,000	Pay 10 months, get 2 free (17% saving)	All Growth + custom branding + HRIS integration option

■ Silver vs Gold — What's the Difference?

SILVER (LKR 1,200/seat): Access to all QPON deals — dining, grocery, pharmacy, retail, entertainment. Employee saves LKR 3,000–5,000/month on everyday spending. **GOLD** (LKR 2,400/seat): Everything in Silver PLUS: • 8% fuel cashback on every fuel purchase • Priority access to manufacturer deals 24 hours early • Premium restaurant and hotel exclusives Gold is designed for employees with a company vehicle or who spend heavily on fuel. A Gold employee spending LKR 40,000/month on fuel saves LKR 3,200 in cashback alone — the Gold seat pays for itself on the first tank fill.

Why This Makes Financial Sense for Any HR Budget

Scenario	Company Cost / Month	Employee Saves / Month	ROI Ratio	Equiv. Salary Increase
500 Silver seats	LKR 600,000	LKR 2,100,000 (avg LKR 4,200/person)	3.5:1	LKR 4,200 net/month per employee — no payroll tax
200 Silver + 100 Gold	LKR 480,000	LKR 1,200,000+ incl. fuel cashback	2.5:1 minimum	Gold employees save up to LKR 8,000/month
1,000 Enterprise seats	LKR 1,000,000	LKR 4,200,000 estimated	4.2:1	Equivalent to 5% net salary increase for all staff

08 SCREENS TO BUILD

Every page and screen the dev team needs to create

HR Portal — Web (business.qpon.lk)

Screen	What It Does	Access
Landing page	Marketing page explaining the benefit. CTA to register.	Public
Register	Company name, HR name, email, phone. WhatsApp OTP verification.	Public
Login	Email input → OTP to WhatsApp → dashboard.	Public
Dashboard	KPI summary cards, activation status, activity feed, usage stats.	HR Auth
Purchase / Upgrade	Plan cards, seat configurator, billing toggle, payment methods, order summary.	HR Auth
Employees — List	Table of all employees with status, tier, savings, actions.	HR Auth
Employees — Add Single	Form: name, phone, department, tier. Sends WhatsApp immediately.	HR Auth
Employees — Bulk Upload	CSV drag-drop, validation preview, confirm dispatch.	HR Auth
Employee — Detail View	Individual employee savings, redemption history, tier, actions.	HR Auth
Analytics	KPI summary, category breakdown, monthly trend, board report download.	HR Auth
Billing — Invoices	Invoice list with status and PDF download.	HR Auth
Billing — Settings	Invoice email, CC email, PO number, payment method.	HR Auth
Settings	Company profile, HR name, notification preferences.	HR Auth

Employee Activation — Mobile Web (qpon.lk/activate/{token})

Screen	What It Does	Access
Token Landing Page	Show company logo, employee name, benefit summary. 'Activate' button.	Token URL
Already Activated	Show friendly message with link to download QPON app.	Token URL
Token Expired	Show message + 'Request new link' button (sends new WhatsApp).	Token URL

Activation Success	Confirmation screen. Deep links to App Store and Google Play.	Post-activate
--------------------	---	---------------

Notifications — Automated WhatsApp Messages to Send

Message	Sent To	Trigger	Timing
Employee Activation Link	To employee	When HR triggers bulk activation or adds single employee	Within 2 min
Activation Reminder	To employee	48 hours after link sent if not activated	Auto
Monthly Savings Statement	To employee	1st of each month — previous month's savings	Auto — 1st
Invoice to Finance	To HR billing email	1st of each month — PDF invoice attached	Auto — 1st
Overdue Invoice Warning	To HR billing email	Invoice due date, +7 days, +14 days	Auto
New Employee Welcome	To employee	After they activate — welcome message from QPON	Post-activate

09 WHAT SUCCESS LOOKS LIKE

How we know the feature is working — from HR's perspective and from QPON's

From HR's Point of View — The Experience Should Feel Like:

- I registered and purchased in under 10 minutes without calling anyone.
- I uploaded 500 employees and all of them received their WhatsApp within 5 minutes.
- I can see exactly how many employees have activated and how many haven't — in real time.
- When a new person joins, I add them in 30 seconds and they get their WhatsApp immediately.
- When someone leaves, I remove them and the invoice automatically adjusts next month.
- My finance team receives the invoice automatically — I never have to chase it.
- On the 1st of every month I download a report that I can hand directly to the CFO.
- I can see that my 500 employees saved LKR 2.1M this month on a LKR 600K spend. That number justifies the benefit every single month.

From Employee's Point of View — The Experience Should Feel Like:

- I got a WhatsApp from my company. I tapped it once. I was using QPON in under 1 minute.
- I didn't have to search for the app, create a password, or enter any details.
- Every time I open QPON I can see exactly how much I've saved this month.
- On the 1st of every month my company sends me a summary of my savings — I didn't ask for it.
- I feel like my company is investing in my daily life — not just my work.

From QPON's Point of View — The Metrics That Matter:

Metric	Target	Why It Matters
Activation rate	≥ 90% within 7 days of HR upload	If employees don't activate, the benefit has no value. High activation = HR is happy.
Redemption rate	≥ 85% of active employees redeem monthly	Employees who redeem stay. Employees who don't redeem are at risk of the company cancelling.
HR churn	< 5% annually	Once HR sees the monthly savings report showing 3.5:1 ROI they will never cancel.
Avg seat count growth	10% increase per company per year	As HR sees the benefit working they expand to more departments.
Time to first activation	< 5 minutes from HR upload	The faster employees activate, the better the first impression for HR.

■ The One-Line Summary for the Dev Team

Build a portal where an HR manager can sign up in 10 minutes, purchase subscriptions for all their employees, upload a CSV and have every employee receive a WhatsApp activation within 2 minutes, then see a live dashboard showing exactly what their employees are saving every month — and download a one-page PDF that proves the benefit is worth it. Everything else in this document describes exactly how each part of that should work.
